

Wilderness Inspired Art

** Natures Fabric **

By Adirondack Artist Elizabeth L. Mangle

“Art is the passion that describes, inspires and completes me. It is an expression of who I am, what I see and how I view nature's intricate beauty. Come view a selection of my oil paintings & photographs for a glimpse into my journey, my vision & my life.”

All my photographs and paintings are inspired from actual Adirondack wilderness landscapes. I have bushwhacked, canoed, or backpacked into very remote areas of the north woods. Their beauty inspires me to capture the moments on film or on a canvas. I am humbled each time I walk into the woods, it's a pristine setting, that will remain so, in reality and in my paintings. Come relive these wilderness moments from the woods....to my eyes....and onto the canvas.

The Adirondack Mountains of New York are filled with spectacular pristine lakes, streams and forested wilderness. There are so many “hidden” wonders in the backwoods of the Adirondacks.....all just waiting to be noticed and appreciated.

My “real” day job is to conserve the natural resources of Hamilton County, in the heart of the Adirondack Park. With the rest of my time, I enjoy the resources that I work so hard to protect.

To you, I share my art, so that you too may experience the wilderness... hear the water rushing over the rocks, see the spectacular colors of the sunset, feel the brisk winter air upon your face as you ski.

Browse the pictures, enjoy and let me know if you would like a piece of this wilderness in your own home, just email me . Quality prints are available and made with KODAK PROFESSIONAL ULTRA ENDURA Paper (resin-coated, silver halide paper that resist fading).

All photographs are as natural as nature itself without digital enhancements of any kind.
